

OVERVIEW

Blue Wolf's Multi-Mode Tactical Vehicle Tail Light provides over 40k hours of on-axle dependability. Our reliable LED lights offer bright running light and braking light in low-light and no-light operations as well as infrared 940nm signature light for Black-Out mode operations, compatible with night vision goggle (NVG) and other night vision devices (NVD).

Made of machined aluminum and supplied in a wide range of colors and finishes to meet customer fleets, our BW-A415 Multi-Mode lights offer visible red "tail" or running lights and brighten during braking action. Measuring just over one inch by three- and one-half inches, these ruggedized lights provide tactical lighting functionality for a wide range of vehicles and most supporting equipment.

The powerful and versatile light designed into a small footprint enables the BW-A415 to be mounted nearly anywhere vertically. These durable lights can be retro-fitted to legacy vehicles as easily as factory installed on the latest warfighter equipment to meet NVG and Black-Out requirements on squad vehicles, ultralight vehicles, supply wagons, trailers and ancillary equipment.

DESCRIPTION

Technical Data

- Voltage: 10-30 Vdc
- Current: 100 mA
- Operating Temp: -40° to 122° F
- Mass: 3.5 oz.
- Material: Cerakote 6061-T6 Aluminum
- DOD-160 section 8 compliant
- MIL-STD-810G compliant
- IR Wavelength: 940nm
- IP67 water rated

Operating Features

- Small footprint
- 4 - Wire: Brake, Tail, IR, Ground
- Low heat output - (LED light)
- Designed and Manufactured in the USA

QUICK SPECS

- 40K Hour Life Span
- 10-30 Volt DC low power
- IP 67 Water Rated
- Versatile Mounting
- 4 - Wire
- Cerakote Finishes
- Brake, Tail, IR in one
- Customization available upon request

PART NUMBER:
●● BW-A415
